

Internet and Web ProgrammingCSE3002 LAB-8

Programme	: BTech	Semester	: Win 2022-23
Course	: Internet and Web Programming	Code	: CSE3002
Faculty	: Dr. Rajiv Vincent	Slot	: L9+L10

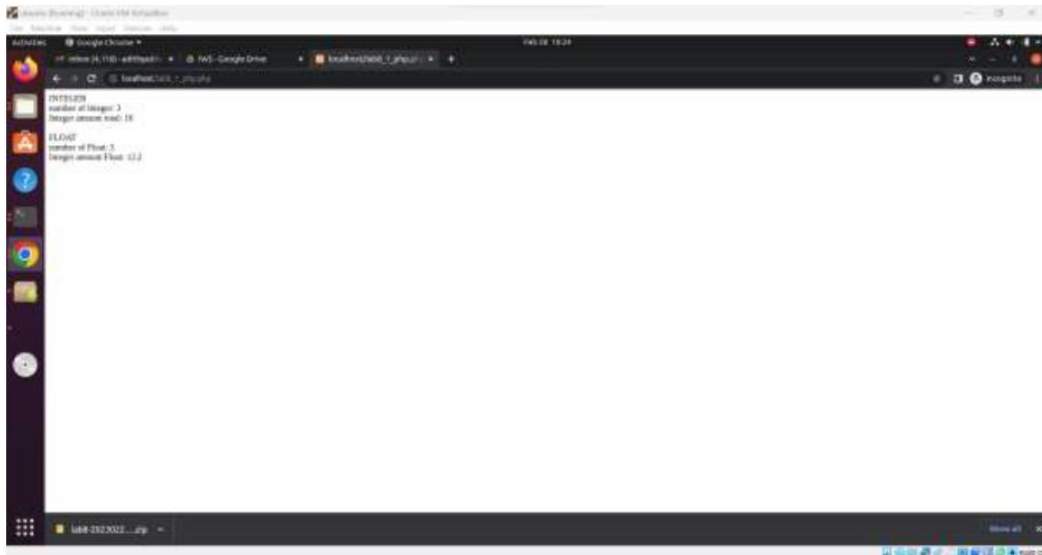

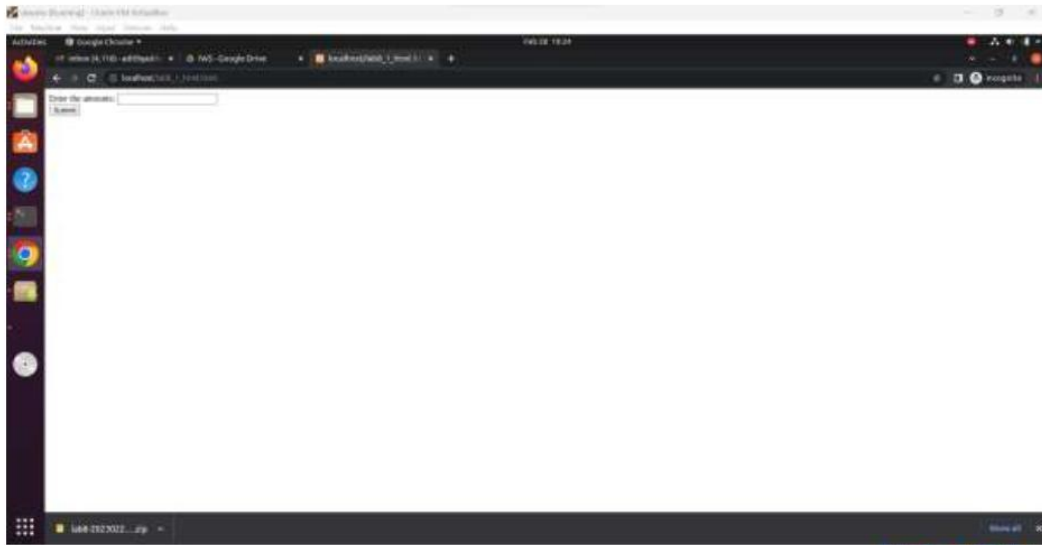

1)HTML

```
<html>
<body>
<form action="lab8_1_php.php" method="post">
Enter the amounts: <input type="text" name="amount"><br> <input
type="submit">
</form>
</body>
</html>
```

CSS

```
<?php
$list = $_POST["amount"]; $str_arr = explode (",", $list); $numInt=0;
$totalInt=0;
$numFloat=0;
$totalFloat=0;
for($i=0;$i<count($str_arr);$i++){
$temp= (float) $str_arr[$i]; if(fmod($temp,1)==0){
$numInt++;
$totalInt+=(int)$temp; }
else{ $numFloat++;
$totalFloat+=$temp;
}
}
echo "INTEGER"."<br>number of Integer: ".$numInt."<br>Integer amount total:
".$totalInt;
echo "<br><br>FLOAT"."<br>number of Float: ".$numFloat."<br>Integer amount
Float: ".$totalFloat;
?>
```

Output

2)HTML

```
<html>
<body>
<form action="lab8_2_php.php" method="post"> Choose the plan:
<select name="plan">
<option value=1>>200 GB</option> <option value=2>201 – 500 GB</option>
<option value=3>501 – 1000 GB</option> <option value=4>1000 GB+</option>
</select><br><br>
Data consumed:
<input type="number" name="data"><br><br> <input type="submit">
</form>
</body>
</html>
```

CSS

```
<?php
$plan = $_POST["plan"]; $data = $_POST["data"]; $amount=0;
switch ($plan) {
case 1:
$amount= 350;
if($data>200){ $amount+=$data-200)*0.2;
}
break; case 2:
$amount= 500; if($data>500){
$amount+=$data-500)*0.3; }
break; case 3:
$amount= 750; if($data>1000){
$amount+=$data-1000)*0.5; }
break; case 4:
$amount= 1000;
break; }
echo "Amount to be paid: ".$amount;
?>
```
